Snake, when people saw it, they might be terrified. In fact, snakes don't harm people, they are just self-defending.

Fun fact, snake molts when it grows up. It's scale will become stronger and more beautiful.

This project uses a snake to represent myself. The first picture shows you that the snake is surrounded by some thing that refer to my hobby community, But in the second picture, my surrounding is combined into a snake. The third one, surrounding is becoming snake-skin. The last one shows that skin changes by the factor of each environment and being camouflage adapting itself to blend to the community that eventually shows my true nature.

Smoking Chills

Conceptual Design

Most people judge smoking people that they are bad. This project represents another point of view as the one who smoke might have a reason. I am one of those people who smokes, Let me tell you we just want sometimes to get rid of stress even if it's not that long, For some people, they still want that little moment to forget everything and just chill. This project will show you that everybody has something imprisoned. Some people they're broken from the inside, some are depressed, stressed. But their way out is not like yours

I realize that one of the reasons that people look down on a smoking person is the packaging of it. So I design new packaging looks, More friendly for those people who not smoking. And the favor that relate to each place in. From type face that each design relate to each place had their own problem, Packaging change bad mood into chill vibe. You can get each vibe by unique scent from each place

XTRO - Extrovert Animals

Illustration

First I am an introvert but I think extrovert people are interesting, They have their own character. So this project is using doodle to form an animal form,t by using people in many actions like an extrovert type of people that they like to stick together and do some activities. Each type of animal is representing types of extrovert, related by their personality and lifestyle.

Product Research & Design

This project is the extension of the previous project, I transfer materials that relate to each type of extrovert. I decided to make a bag product when you go out you have to pack something with you so I choose bag products for an extrovert. The shape of each bag has shown its own relation with personalities.

You can see that I'm still a snake, but somethings have changed like being less arrogant and feeling calmer. In the first project, the snake is still on earth but this project snake is going to space. humankind, In past human thought sky, is the limits, since time passes people no that they are no limit. Like me that at first I don't know anything but now I learn a lot from my experience, research and from other people.
