EDUCATION

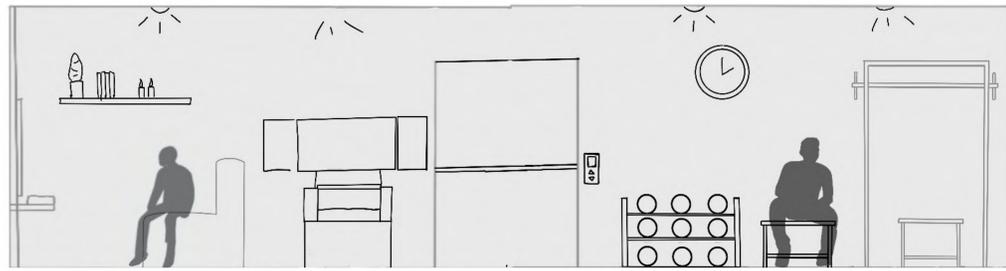

Present - 2020	Mahidol University International Demonstration School 3 years G12: Sport science, Skill for life, Integrate Science G11: Psychology G10: Architect
2019 - 2010	Bangkok Christian College 9 years
2018	Southland Boys High School (New Zealand) 1 year
2009 - 2007	Lerthlah School 3 years

ACTIVITIES

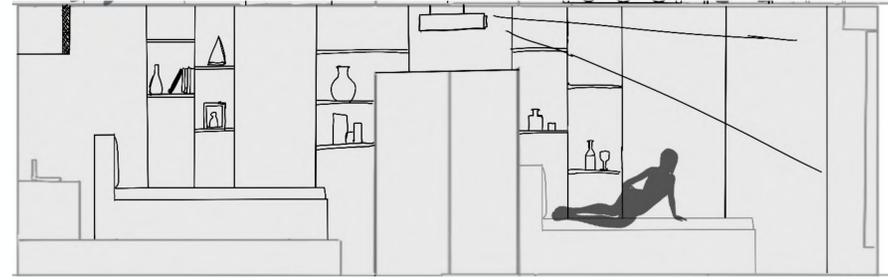

2021	Series shooting One31's series project	2019	Dance show Special guest show at Indonesia Yorch Yongsin's dance team at 3 zaap show BCC school's birthday dance show
2020	Community service at บ้านสามขา Create an activities for mountain tribal children		School's Cheerleader at MUIDS
	Workshop boy band project 1day gen 2 project	2018	Sport day Cheerleader at BCC
2019	Dance competitions Popular vote and The best new comer award at MBK cover dance 10th place and popular vote at Watergate Pavilion cover dance 11th place at Saint Gabriel	2017	Badminton competition at New Zealand
		2016	Rugby competition at New Zealand
			Summer school at USA Salt Lake City Public Schools

HEXA
MODU
L A R

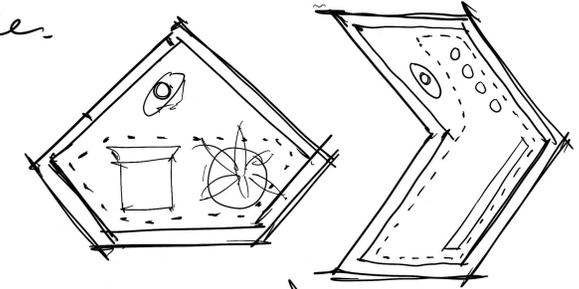

As I live in my house during COVID-19, I have found that the space of my house isn't enough for the 4 of us. So I decided to design a space which suite our wants.

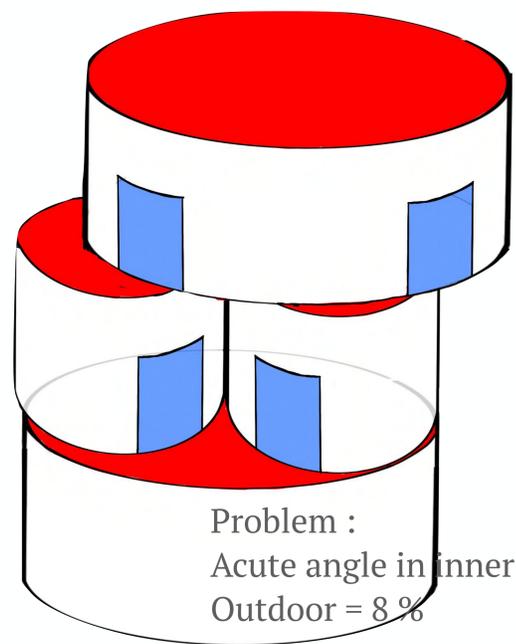

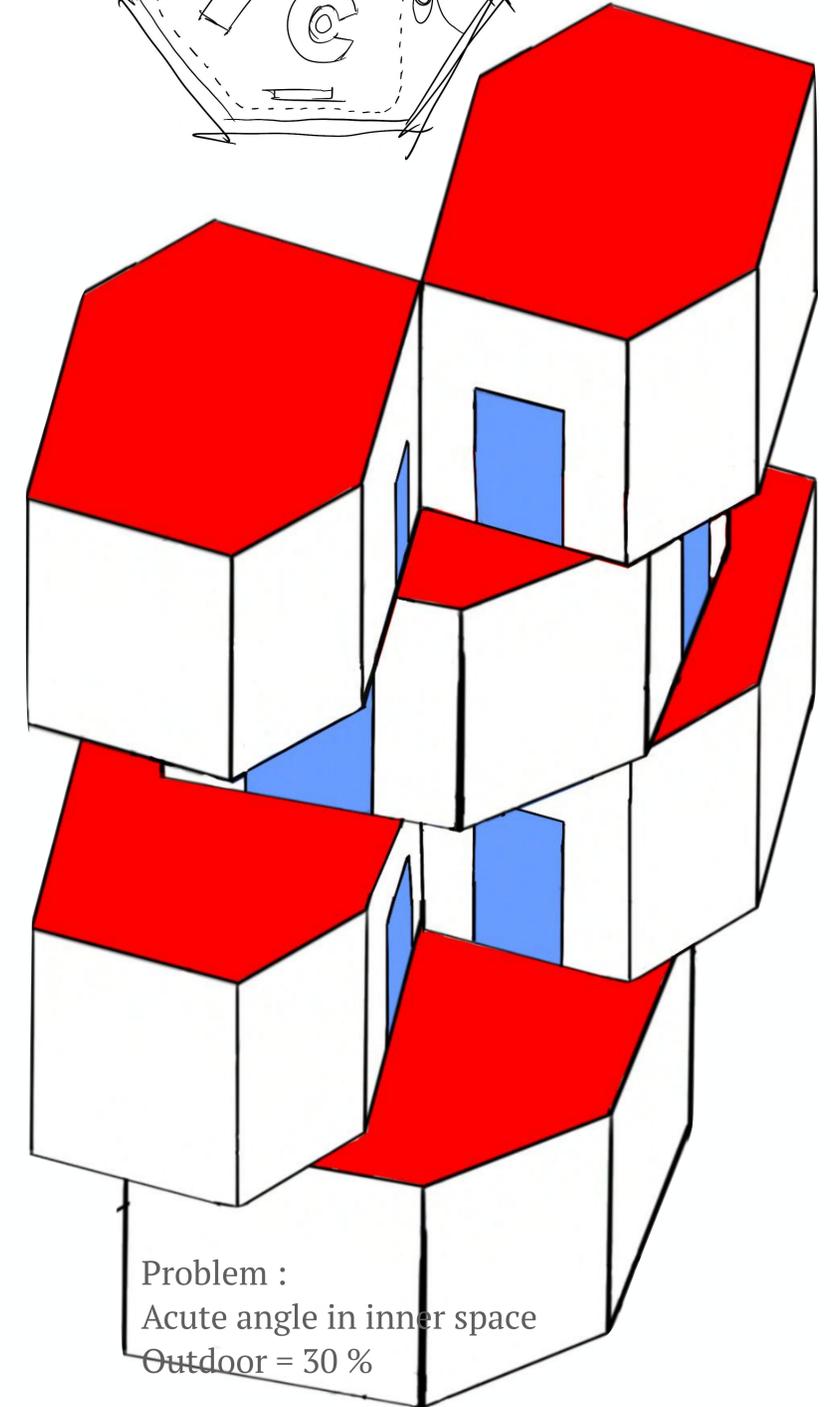

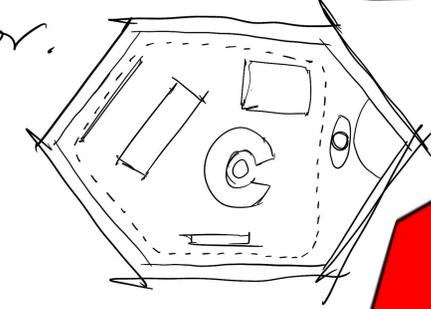

From my research, I tried a few kind of geometric shape to find the shape that really suite what the family want. As a result I found out that the shape that suites the best is hexagon. Our family issues is that we didn't have the same style, me and my dad doesn't like to go outside a lot but my mom and grandma like to go out. As you can see that when the hexagon are overlap on each other there are parts that leaves more outside space than other shape.

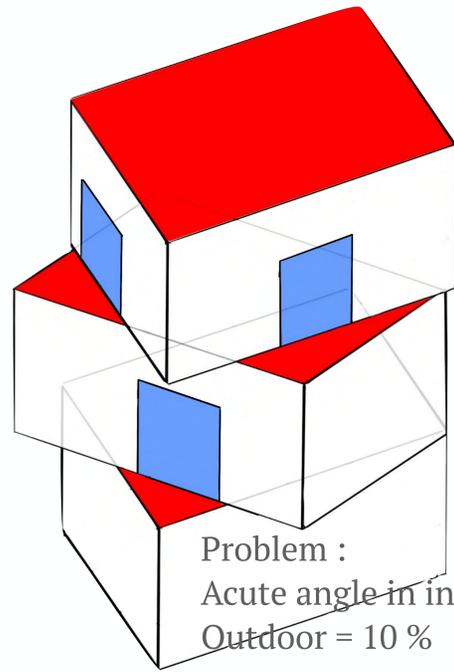

Terrace.

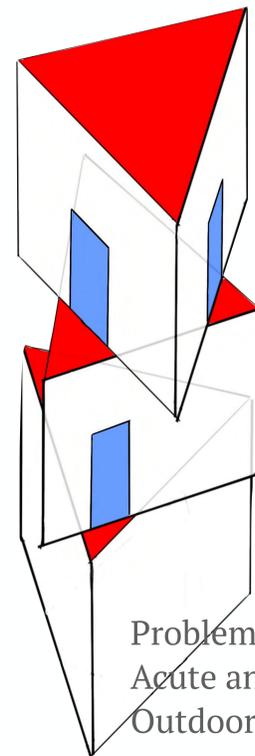

Indoor.

Problem :
Acute angle in inner space
Outdoor = 8 %

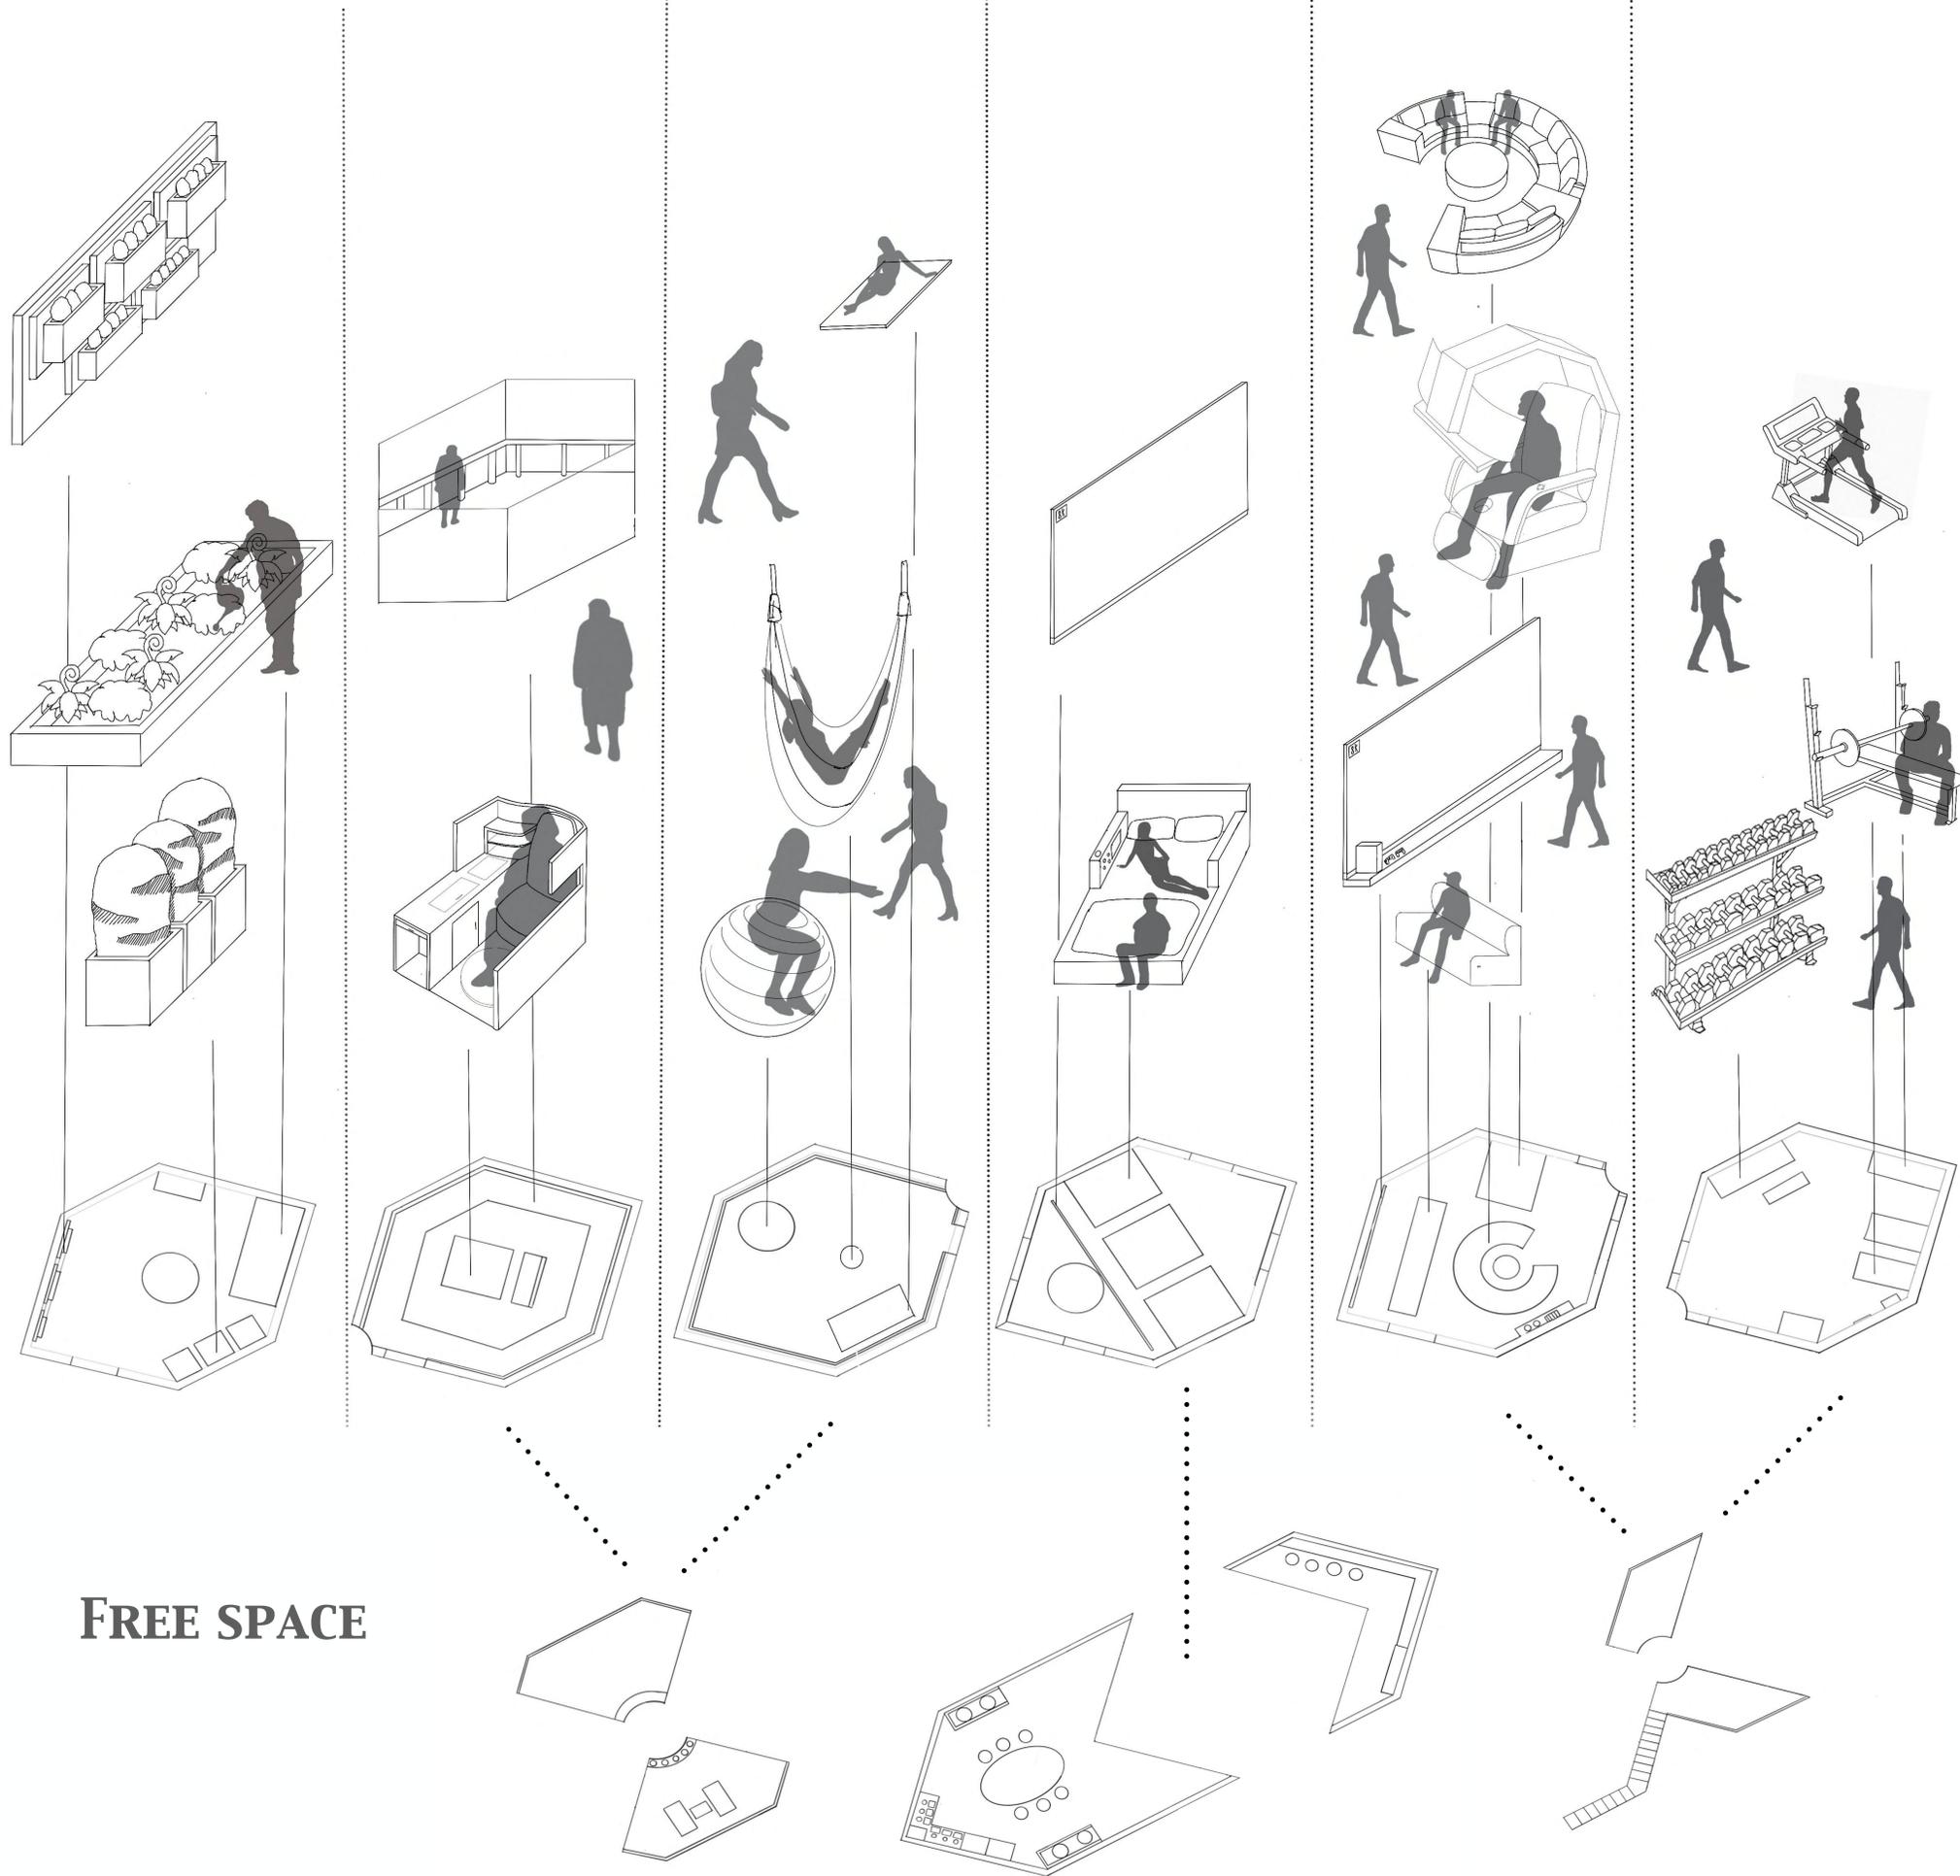

Problem :
Acute angle in inner space
Outdoor = 10 %

Problem :
Acute angle in inner space
Outdoor = 5 %

Problem :
Acute angle in inner space
Outdoor = 30 %

ACTIVITIES

Grandma: Gardening traveling, and yoga

Mom: Yoga and watch movies

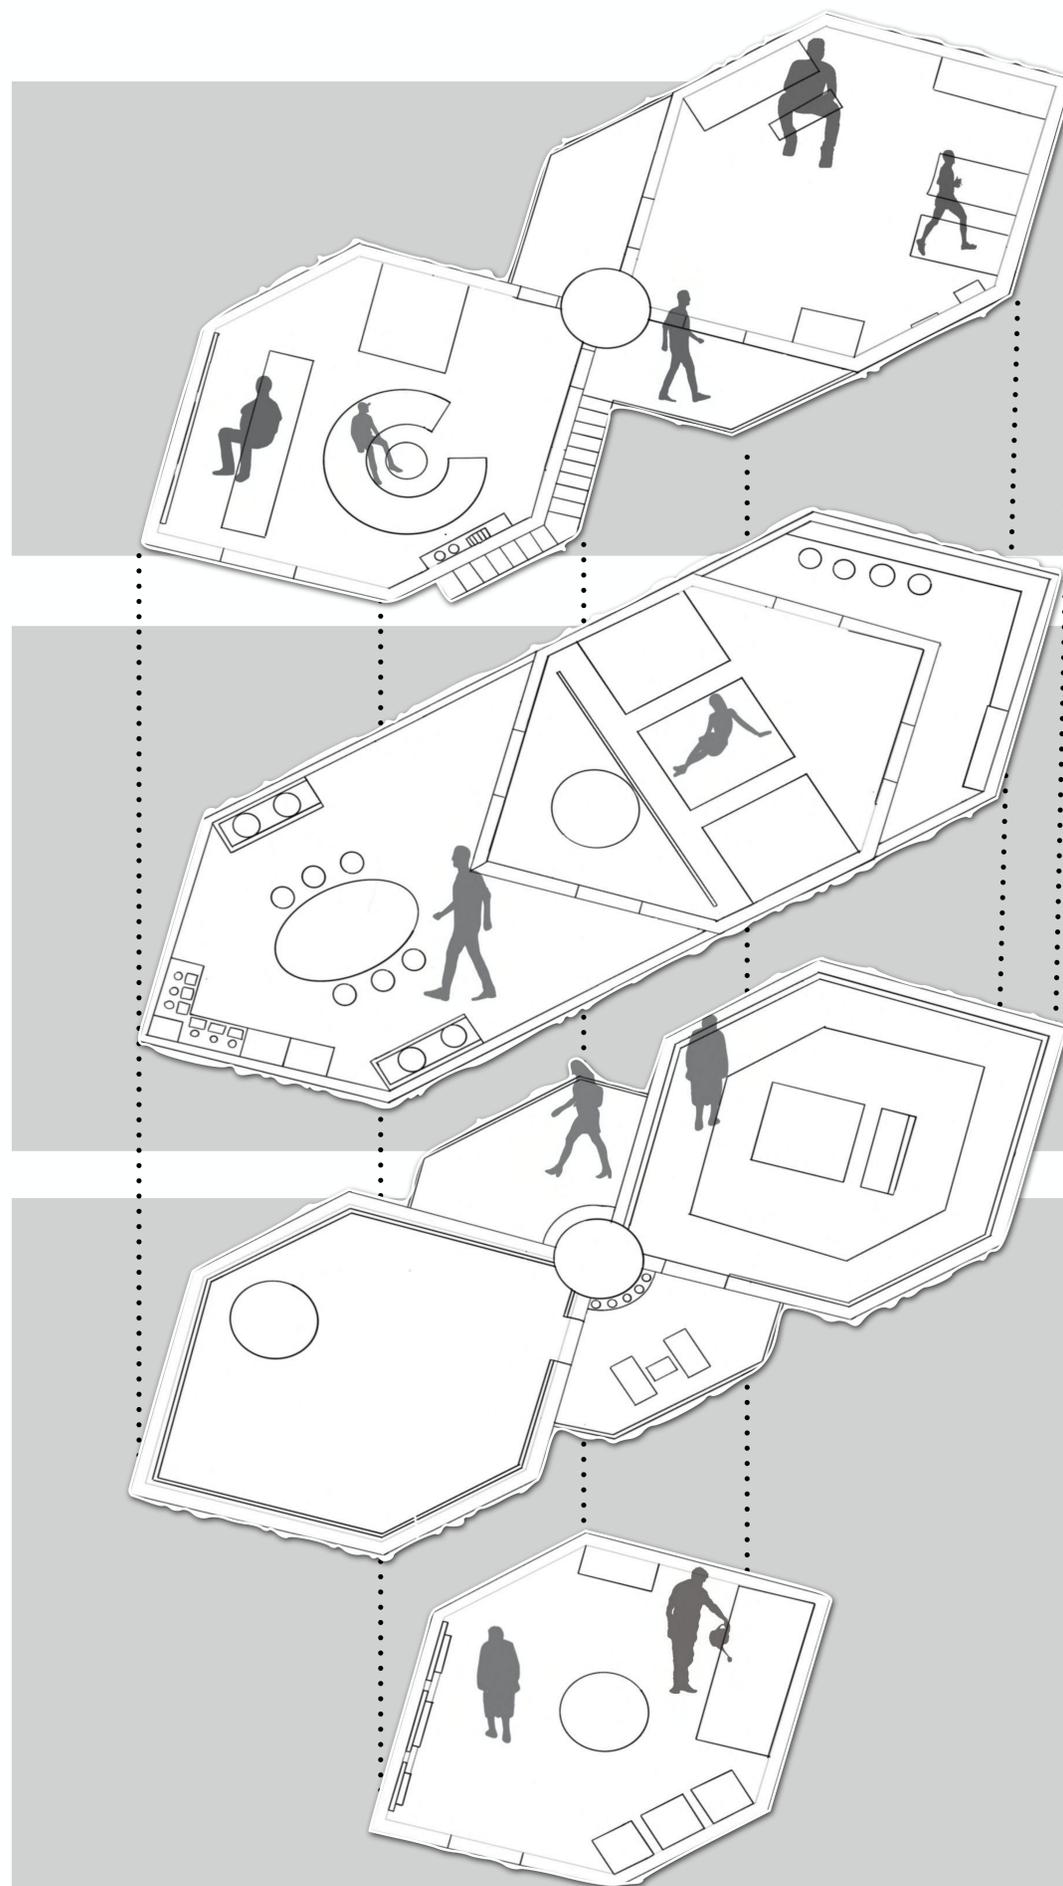

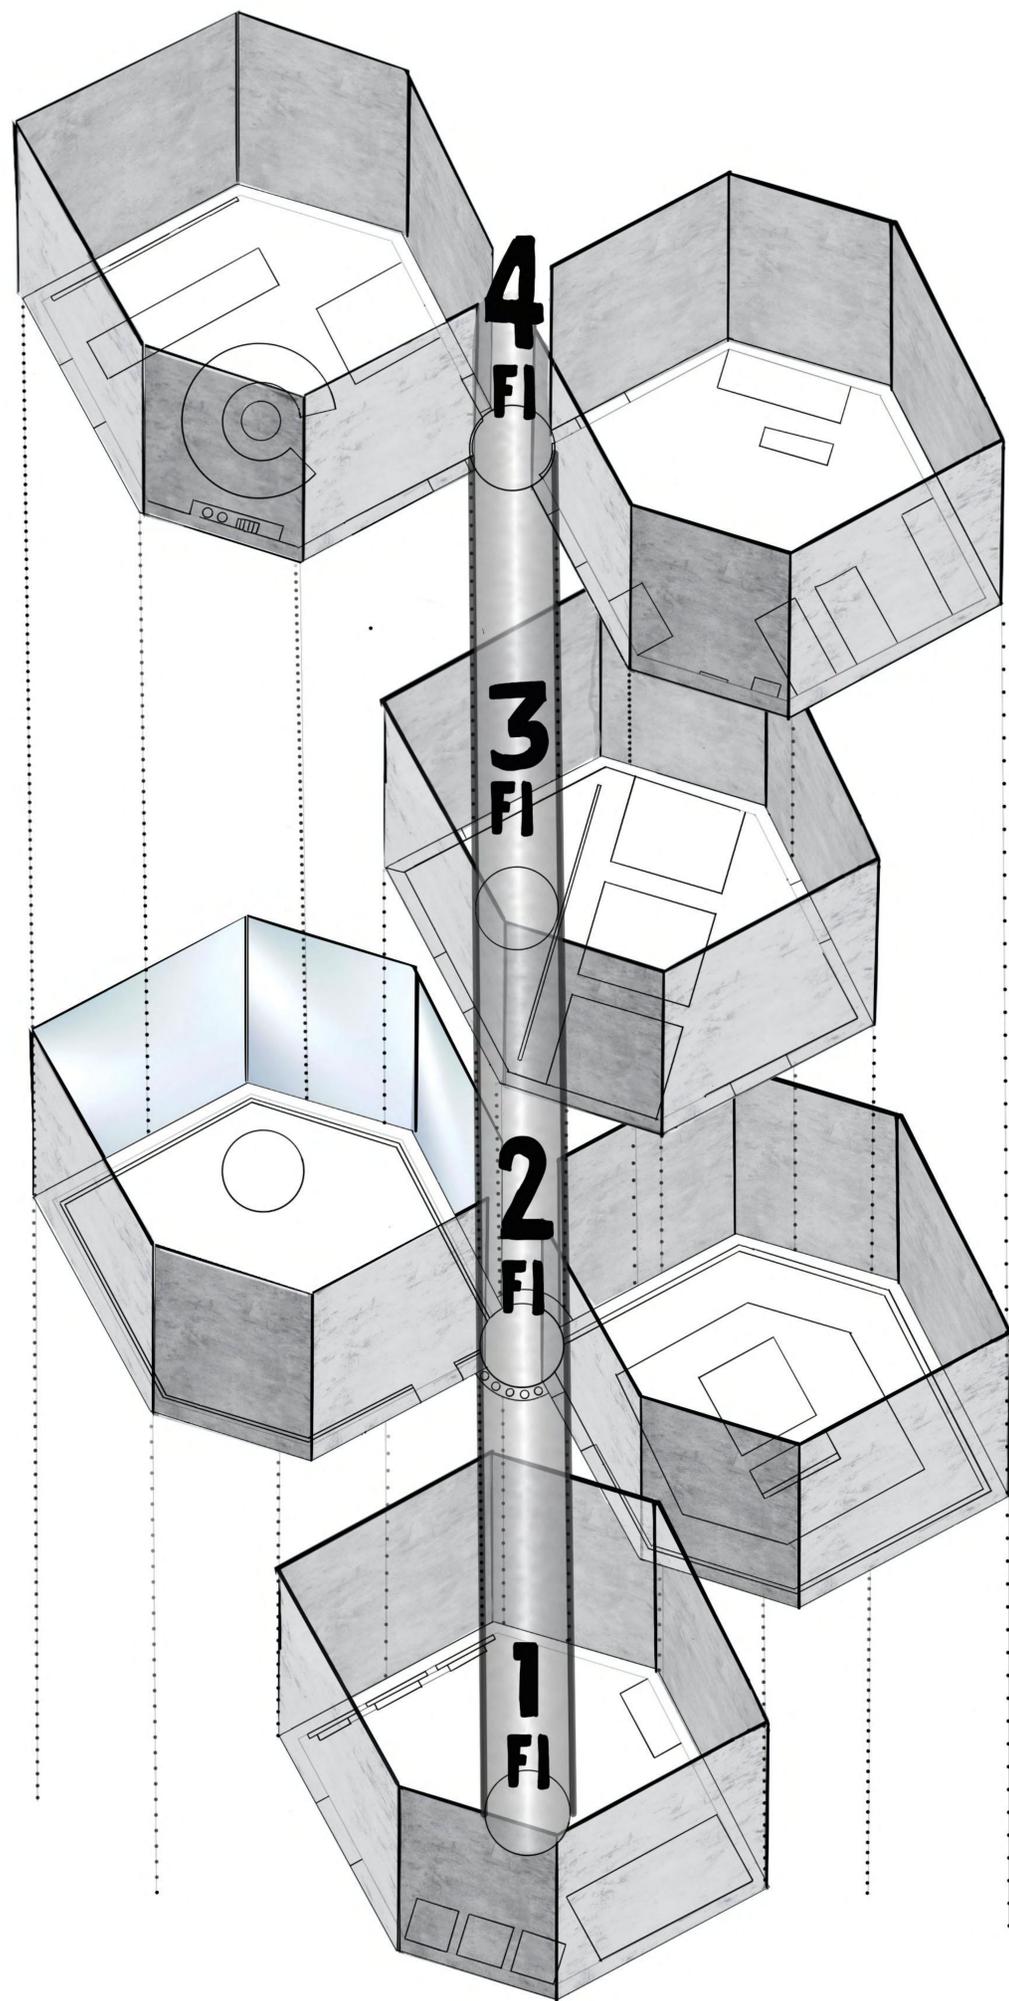

Dad: Fitness, watch movies, and gaming

Me: Fitness, watch movies, and gaming

The diagram shows the activities in each section of how each person use their facilities.

FREE SPACE

The free space shows the different between how each person in the family uses the space which me and my dad doesn't use a lot because we only stay inside but mom and grandma uses a lot.

INTROVERT SPACE

Fourth floor is about me and my dad. As I said before that we don't usually go outside of the house.

COMMUNE SPACE

Third floor is a cinema room which is the space that everyone are involve in this activities.

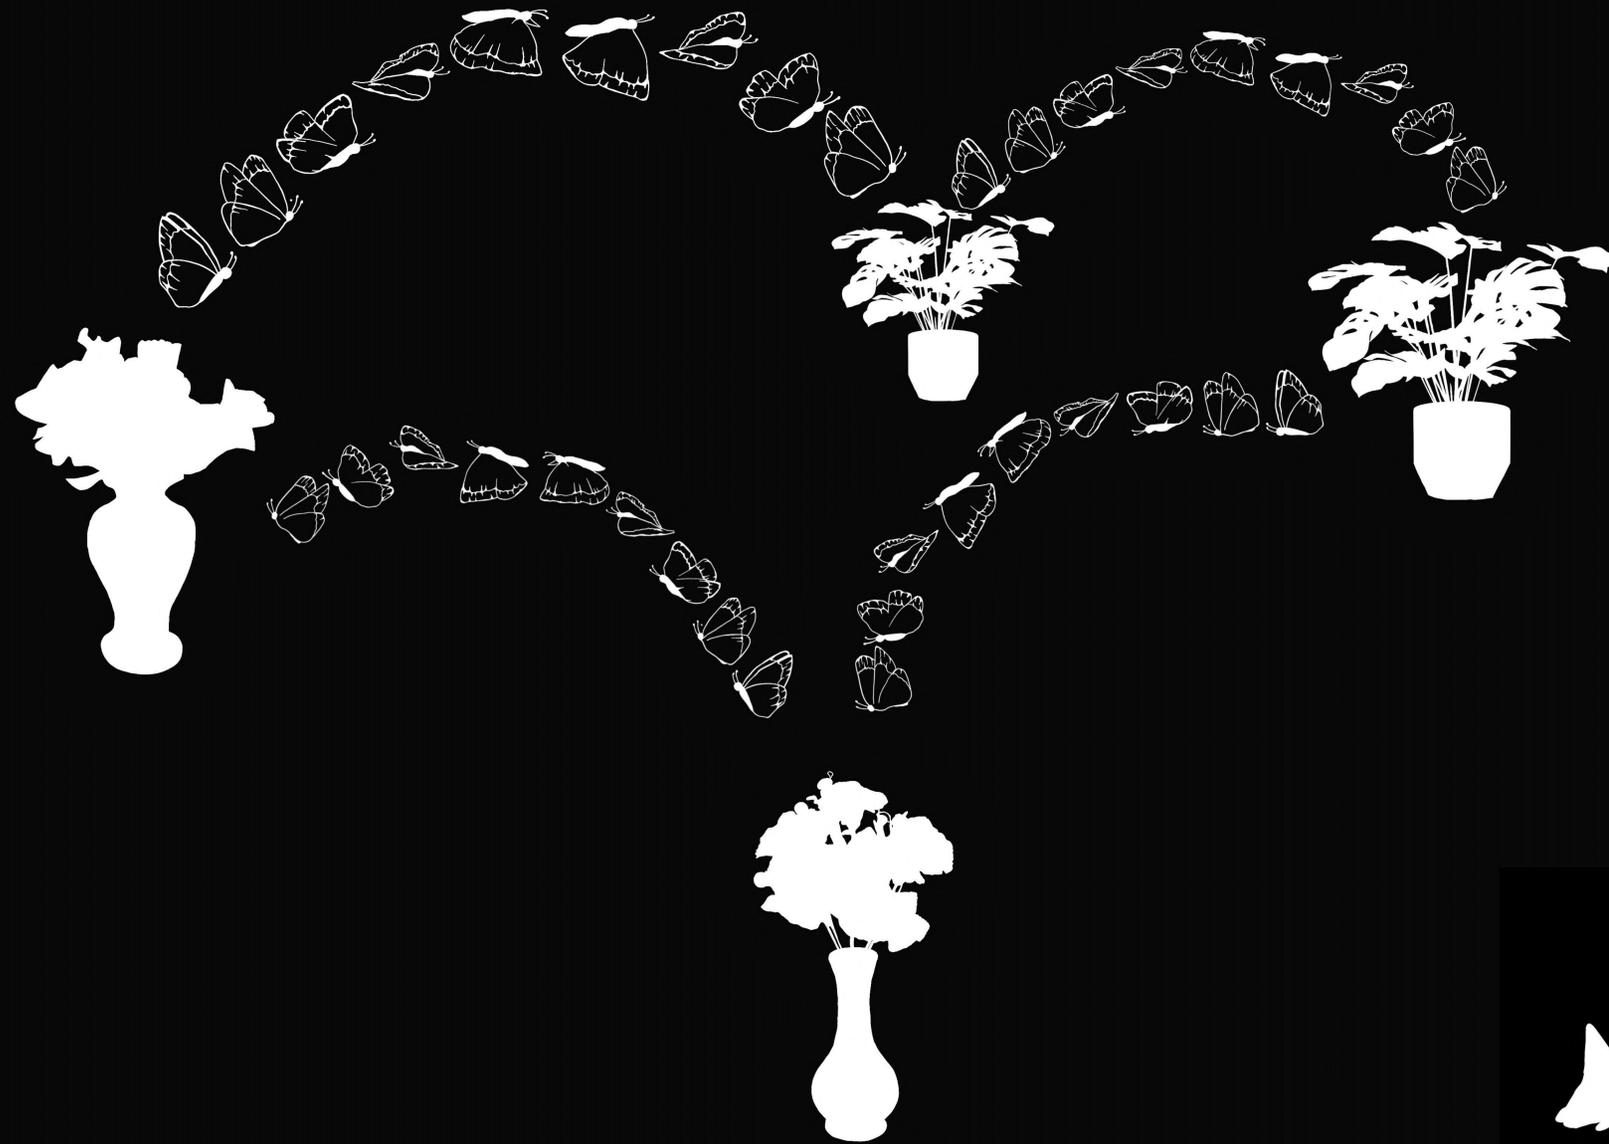

EXTROVERT SPACE

First and second floor are for my mom and grandma. As I've mentioned before that they like to go outdoors a lot so their are more space than the fourth floor

Life Cycle

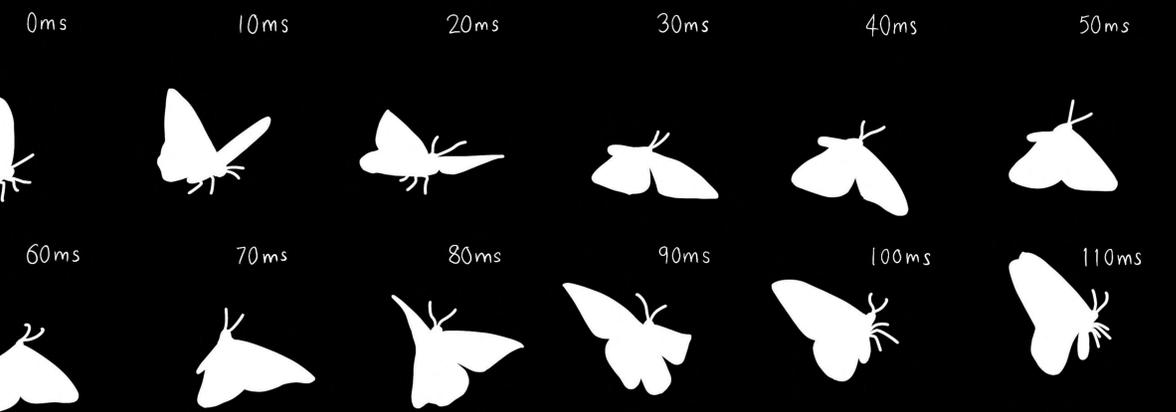

This project is made to make urban economy have more trees, flower, and reduce air pollution in the city. Also made for people that stay in apartment and wanted to have a pet which most apartments don't allow to.

Butterflies lay eggs on a leaf. After the eggs hatched, the caterpillar will eat the leaf as their food. When it fully collected their resource it will then find a place to become the stage of larva. After a few days it will change to chrysalis stage and start to come out as butterfly form.

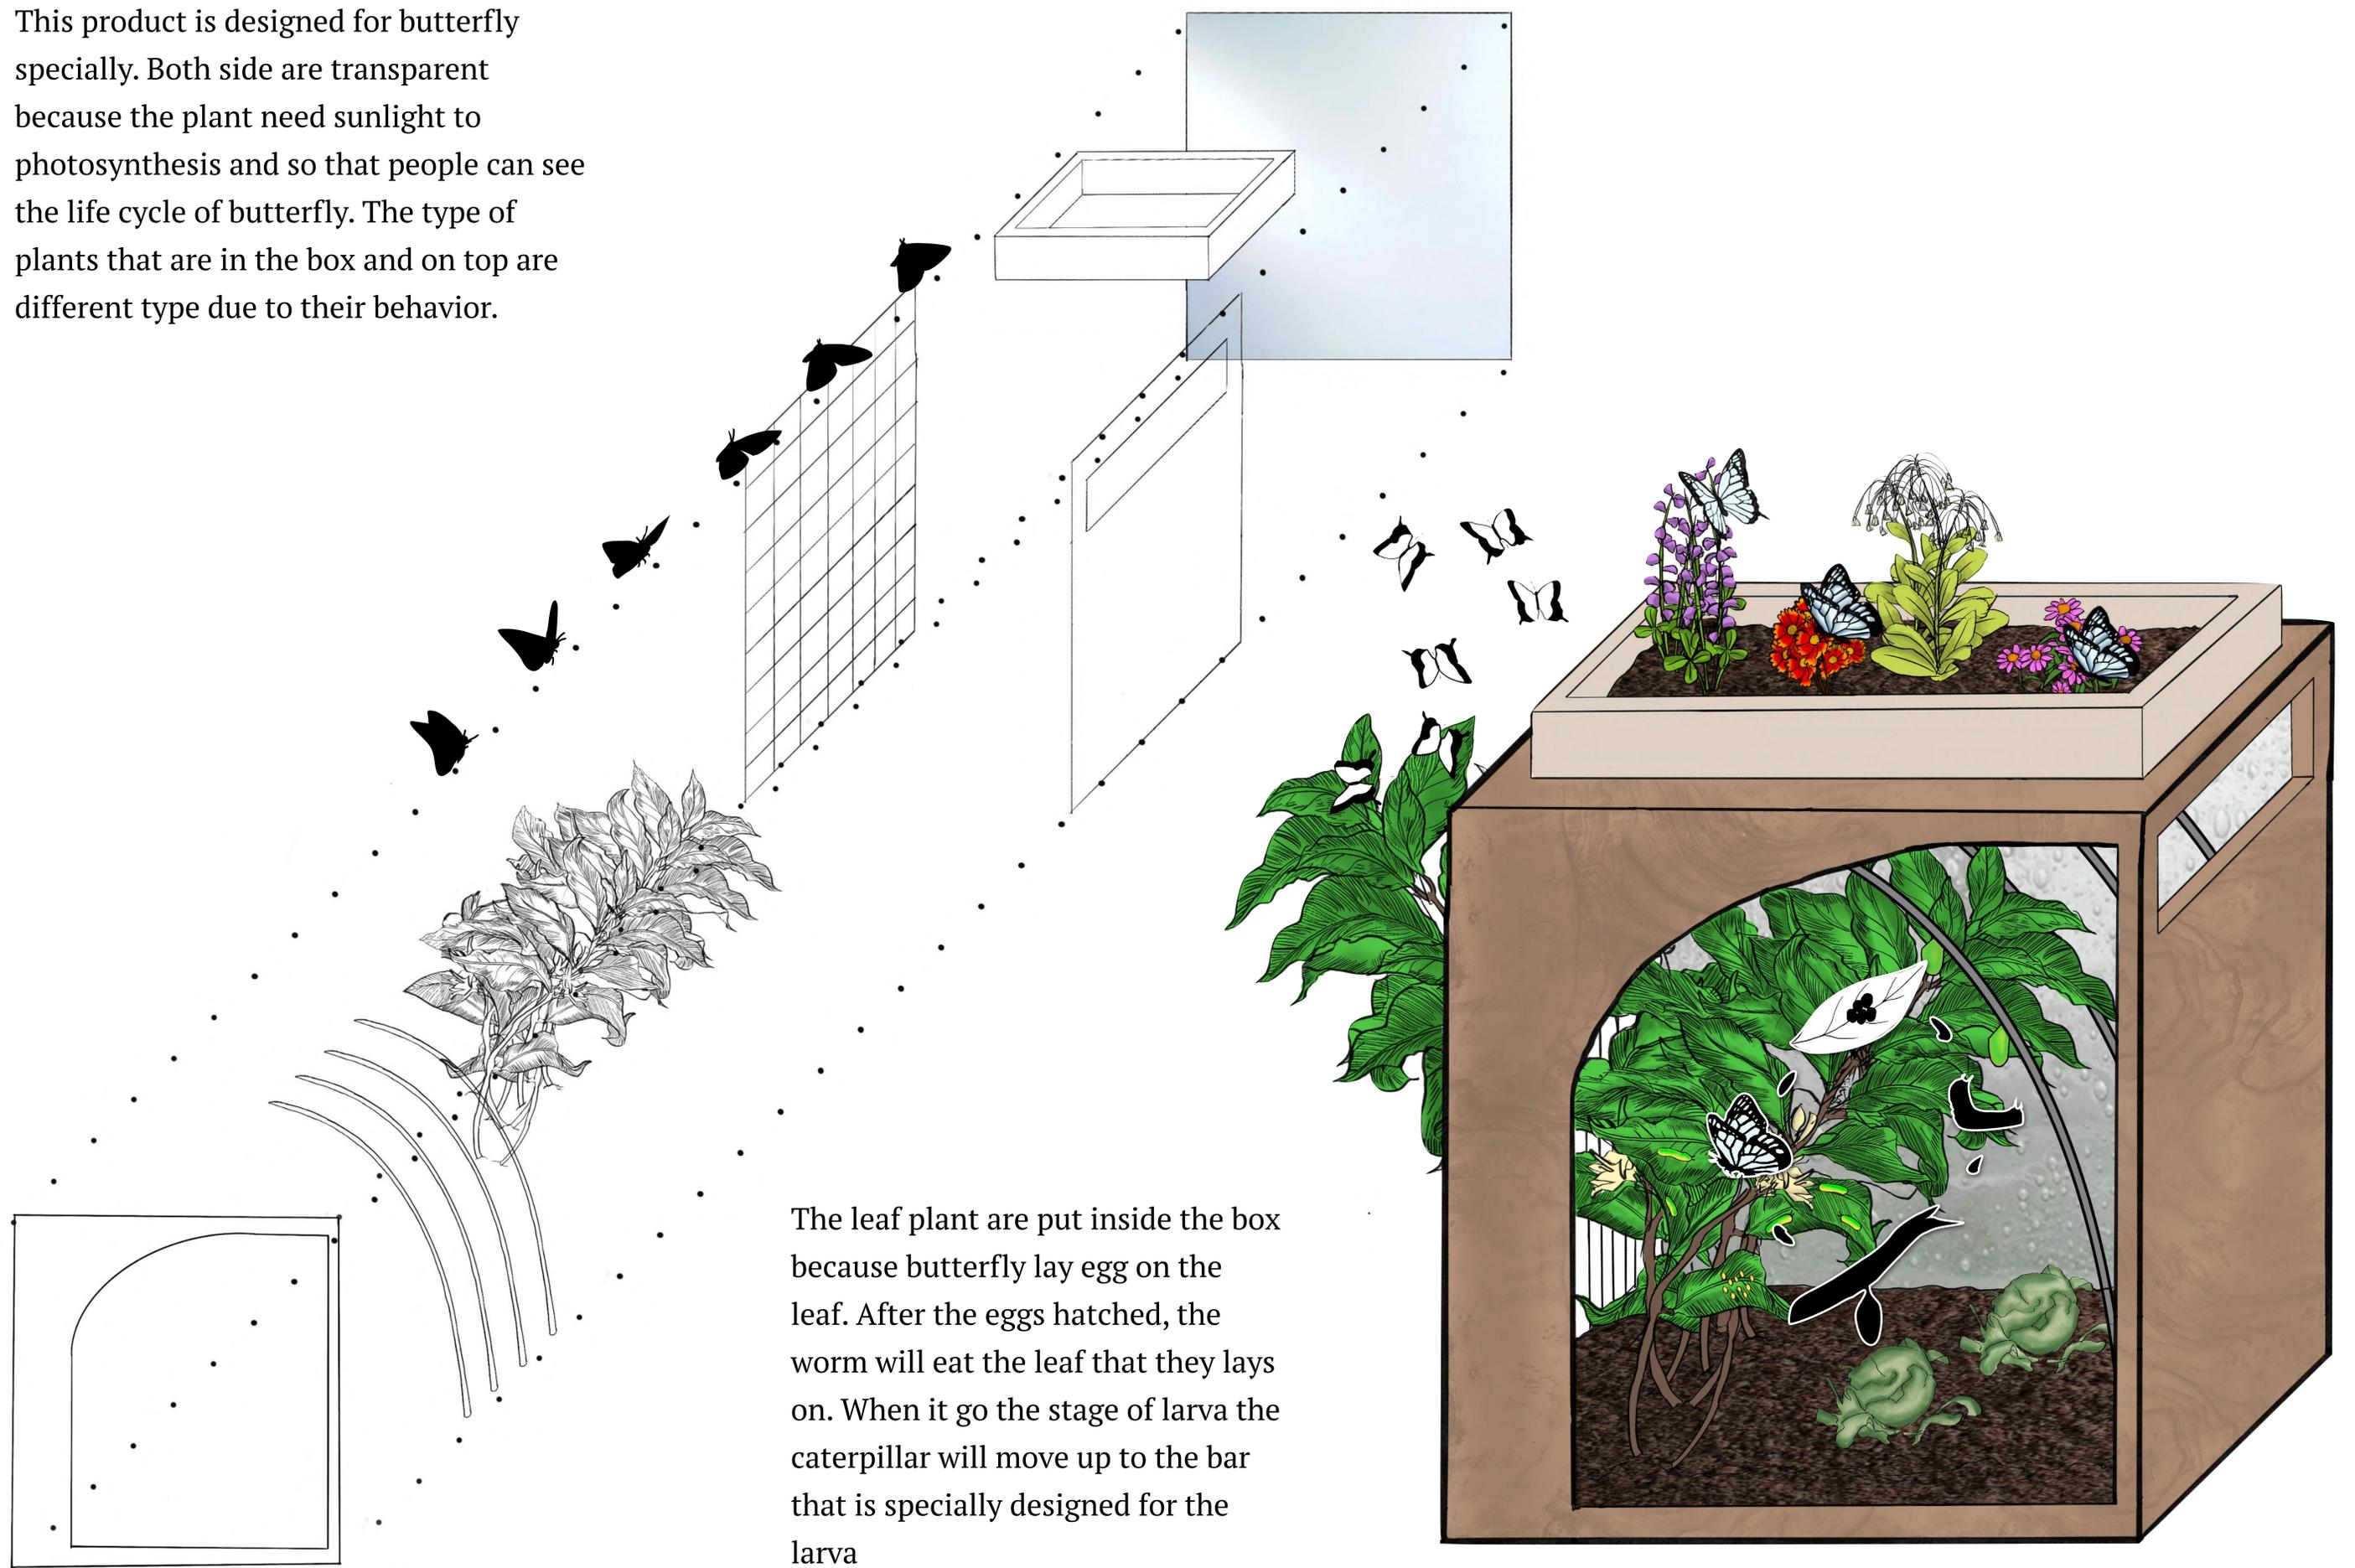

The diagram above shows the movement of butterfly. As its shown in the diagram that butterfly travel from one flower to another flower because it is attracted by the polen of the flower but when it lay eggs it will lay of a leaf instead of flower.

From my research, I found out that the butterfly travel about 70 miles a day which means that it move around 1.3 meter per second

This product is designed for butterfly specially. Both side are transparent because the plant need sunlight to photosynthesis and so that people can see the life cycle of butterfly. The type of plants that are in the box and on top are different type due to their behavior.

The leaf plant are put inside the box because butterfly lay egg on the leaf. After the eggs hatched, the worm will eat the leaf that they lays on. When it go the stage of larva the caterpillar will move up to the bar that is specially designed for the larva

This is a picture of a city after having my product in it. You can see how the atmosphere looks abundance of natural resources. It can be tell by how there are many butterfly because if a place have many butterflies it means that the place is very naturally.

F O N

This project is about a reflection of the old society that most old people want their children to become doctor without asking them what they actually want and that makes them feel stressful and causes harmful actions.

The requirement of going to a medical school is very high. It requires Ielts, Toefl, CU-TEP, BMAT, SAT, and GPAX which is very hard for a person to get a high score on these subjects. Also, Thailand is a place that people give high values to doctor so it make many people wanted to become a doctor and it causes a high competition.

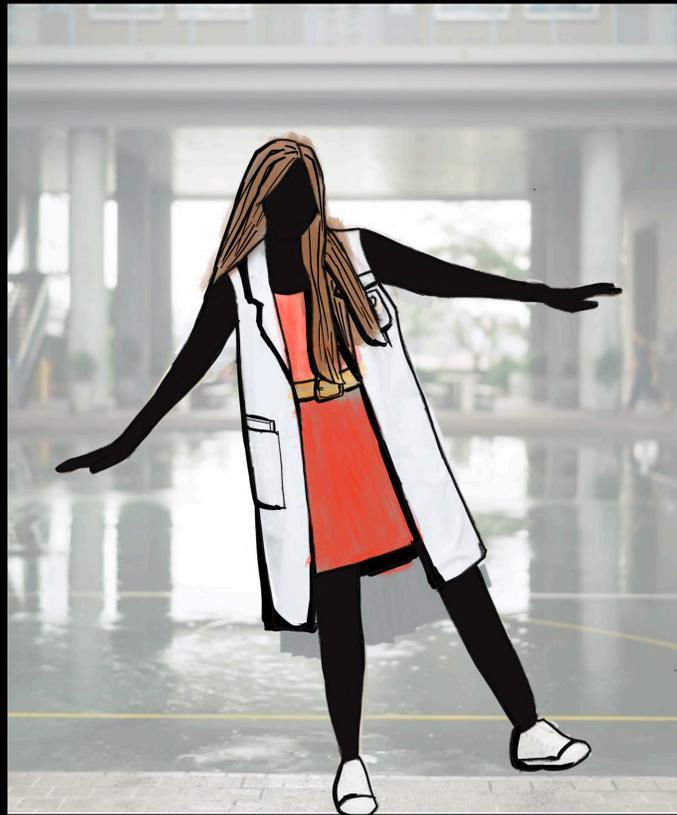

Timeline of parent's expectations

Expectation

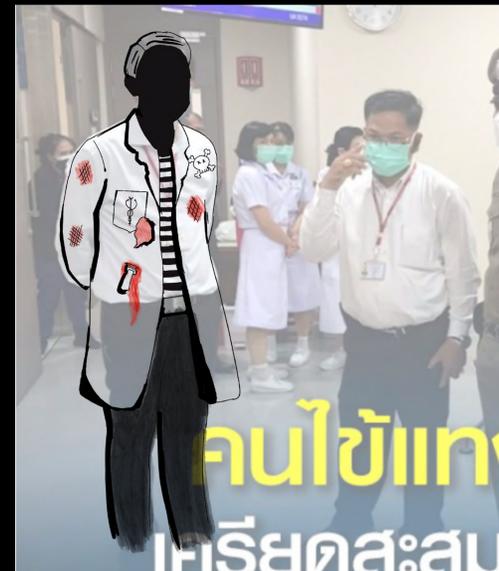

Most old people still have a mindset that their child should study at triamudom because of their education and how hard the competition of this school is. After finishing high school, they would expected their child to go to either Chulalongkorn or Thammasat University because it is the 2 best University in Thailand. Lastly becoming a doctor with a high income.

This costume shows how the doctor can't control the patient by wearing an inmate shirt that have long sleeves and his head is covered by a mask.

This costume is inspired from inmates costume combining with psycho patient's costume. The messy hair shows how stressful this person is.

This news is about a doctor being stabbed by the patient so the design have a detail about the action that the patient did.

This News was about the doctor's suicidal. So the design shows how deathful and stressful the doctor was by using the scythe, rope and belt.

The design show two different type of people. First type of people are the people that are force to be a doctor which they need to study hard and need to be on track. The second type of people are the people that aren't being force but they really wanted to be a doctor by themselves. These people will not be as stressful as the another type of people because they can go hangout as much as they want but the other type can't.

The first person costume are inspired by a doctor's costume combining with inmate and psycho's costume. I use the stripes of an inmates shirt to show how they are being control in a rules like how the inmates are being control in the prison. The long sleeves and the belts are parts of the pyscho costume which also represent how they can't control their own actions.

The second person costume are also inspired by a doctor's costume and a designer's brand clothes. I decided to cut the arm of the gown coat to show how they are more comfortable to show their personality. The dress and the accessories also shows how the person are more comfortable to express their achievements.

EFFECT

OF

GODS

Sketch Draft

This project is created from my favorite childhood character. Since I was a kid I really like to watch everything about greek's god. So I decided to design these character into a game character. The game that I choose is ROV which is also the game that I have been playing for 5 years and it is one of my favorite game.

Final Design

The god of the dead and the king of the underworld. He presided over funeral rites and fought for the dead's right to a proper burial. Hades was also the god of the earth's hidden wealth, from the fertile soil that nourished the seed-grain to the gold, silver, and other metals that were mined.

The King of the Gods and the god of the sky, weather, law and order, destiny and fate, and kingship. He was represented as a powerful, mature man with a strong build and a thick beard. A lightning bolt, a royal sword, and an eagle were his signature symbols.

Olympian god of the sea, earthquakes, floods, drought and horses. He was shown as an oldest brother with a strong body and a beard holding a trident.

HADES

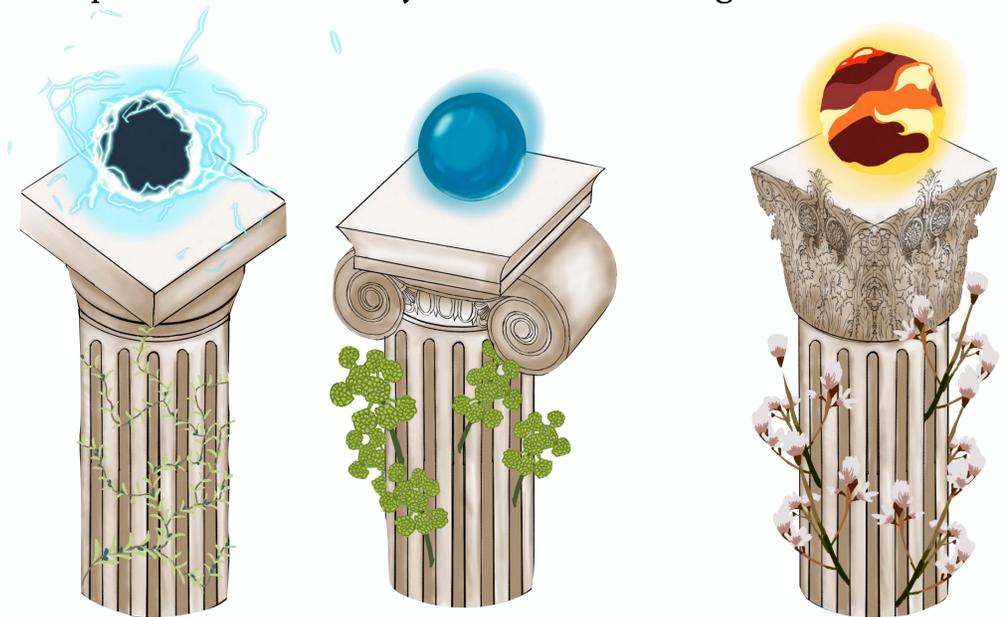

ZEUS

POSEIDON

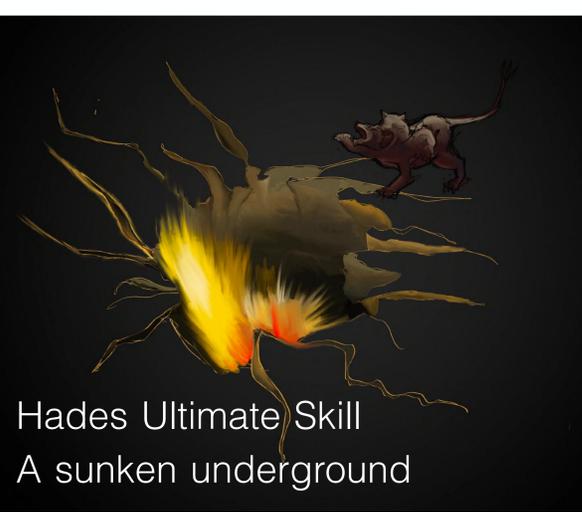

Each tower are designed from greek's column which related to the theme. Each decoration of the towers are inspired from the symbolic of each gods.

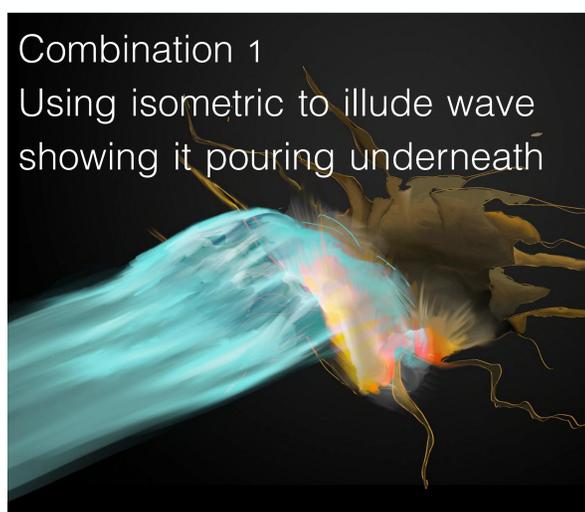

There are 3 design of column because RoV have 3 layers of tower so I decide to design 3 type of towers.

- Trident, water, wild celery, and dolphin symbolize Poseidon.
- Lightning sword, lightning bolt, olive tree, and eagle symbolize Zeus
- Royal scepter, fire/lava, asphodel and buffalo symbolize Hades

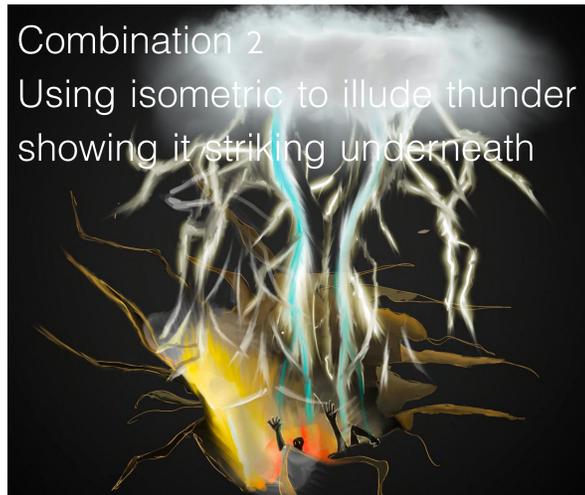

Hades Ultimate Skill
A sunken underground

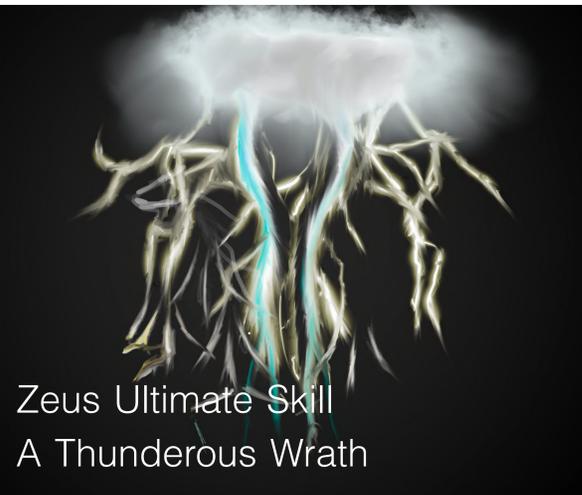

Combination 1
Using isometric to illude wave
showing it pouring underneath

Poseidon Ultimate Skill
A god's wave

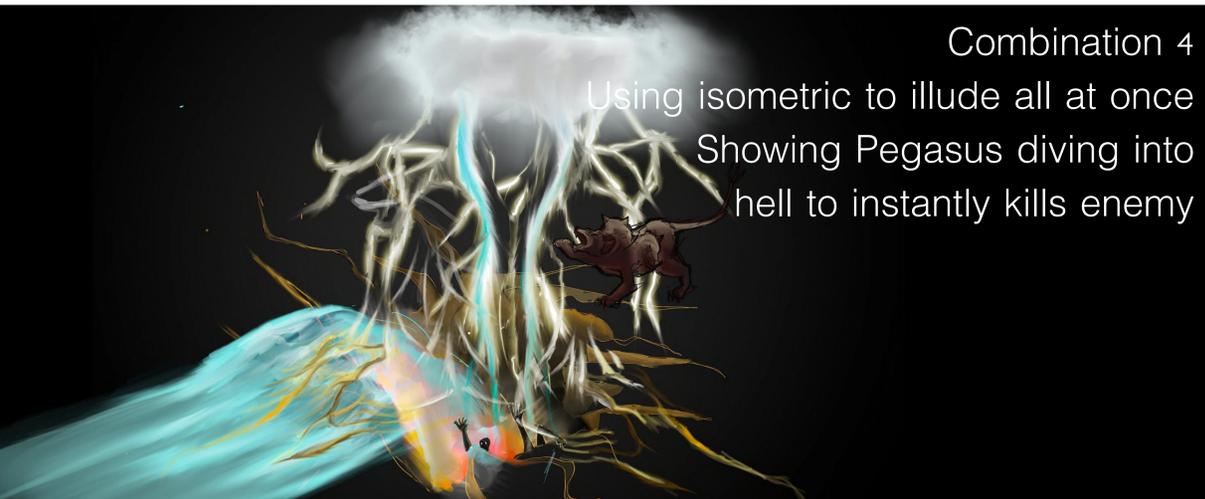

Combination 2
Using isometric to illude thunder
showing it striking underneath

Zeus Ultimate Skill
A Thunderous Wrath

Combination 3
Using isometric to illude thunder
and wave showing combination
of lines forming Pegasus

Combination 4
Using isometric to illude all at once
Showing Pegasus diving into
hell to instantly kills enemy

Skill effects

In RoV, there are 3 skills in each characters. The picture above shows 3 types of skills from 3 different characters when they combine together. The first picture show Hades's skill which is a hole that come from hell. The second picture shows when Poseidon used his skill the tsunami flush down into the hole and causes an effect. Lastly, the last picture shows when Zeus used his lightning struck from the air and causes an effects of horse which is a symbol of Zeus and also struck into the corpses that crawling up from hell.

This effects will only work if the players in the team uses these 3 character.
